EDUCATION

Brigham Young University

Apr 2026

Bachelor of Science: Statistics – Data Science

Provo, UT

Minor in Business

- Exams Passed: SOA P, FM, FAM, ASTAM | SOA VEE coursework completed (Accounting, Economics, Statistics) | Sitting for SRM January 2027
- Proficient in SQL, SAS, Alteryx, MS Office Suite, VBA, Python, R, Tableau, C++
- Coursework: Machine Learning, Bayesian Inference, Database Management, Financial Mathematics
- Volunteer Service: Full-time volunteer representative, Baja California, Mexico (Sept 2022 – Sept 2024): directed and trained 5 teams of 20+ volunteers; achieved Spanish fluency

EXPERIENCE

Centene Corporation

May 2026 – Present

Actuarial Intern – Medicare Part D Forecasting and Reserving

Remote

- Develop repeatable SAS-based analytical workflows integrating claims, enrollment, and risk adjustment data for 7M+ Medicare beneficiaries, documenting logic and assumptions for team reuse
- Diagnose data-quality issues through audit and validation checks, uncovering a 900k-member crosswalk mapping error and building corrected member-matching logic across years
- Lead Excel-based cohort cost and risk score analyses across 2023–2025, identifying key drivers of cost trends and summarizing findings for management to resolve data inconsistencies affecting actuarial projections
- Utilize AI tools to debug workflows and quickly master Part D concepts, accelerating cohort-split decision making

Ductile Iron Pipe Research Association (DIPRA)

Jan 2026 – Apr 2026

Data Analyst Intern

Provo, UT

- Led a team of 5 to design and implement a SQL database for improved storage structure and analysis of data
- Built and configured an Azure SQL database, implementing data pipelines, schema design, and query optimization
- Documented schema and hosting protocol, then trained non-technical stakeholders to take over admin responsibilities
- Normalized 1,000 multi-source records across 20 fields for SQL database integration

Cambia Health Solutions

Jun 2025 – Sept 2025

Actuarial Intern – Provider Contracting Analytics

Remote

- Identified \$25M in projected financial risk per quarter by building an automated model, enabling proactive mitigation strategies (Alteryx, SQL)
- Analyzed behavioral patterns and financial impact for 10K members affected by a major provider transitioning out-of-network, summarizing findings for the provider contracting team
- Quantified and benchmarked high-outlier risk across 400 provider contracts, allowing comparison and adjustment between different contract terms
- Evaluated, tracked, and validated 20 reimbursement rate increases for Professional, Hospital, and Ambulatory Surgery Center providers using Excel-based models

BYU Department of Statistics

Jan 2022 – Jul 2022, Sept 2024 – Apr 2026

Teaching Assistant – Probability and Inference, Statistical Modeling

Provo, UT

- Held office hours 3–5 times per week, troubleshooting R code and explaining statistical modeling and probability concepts one-on-one
- Reviewed and provided weekly feedback on assignments for 70 students, applying consistent grading standards
- Led 2–4 exam review sessions per semester, presenting course material and fielding live questions from 50–100 students
